SMART OFFICE - CUSTOMER BENEFITS

This is a new concept for our Space² Virtual office clients and allows you to walk into NBSH and walk out with the following:

- A superior Virtual office package with prime London City mail address, 0207 number answered by our team when required, with touchdown facilities, shared kitchen, business support and reception services including signage board branding
- Soft Phone software installed on your laptop with an 0207 DDI ringing on it or alternatively take an IP 4610 handset with remote access software and set up call paths and voicemail yourself.
- All calls billed at Stonemartin's discounted rates
- A separate DDI for faxes that will be delivered as PDF's to your Outlook. Documents can be sent as faxes via the same program
- A compatible mobile phone twinned with the Soft Phone offering with full feature control and optional push e-mail via either Blackberry Enterprise or MS Mobile. Your mobile rings when your desk phone rings
- Optional access to a partitioned area of the virtual server to store documents, e-mails, and to utilise a safe internet connection
- Will work anywhere in the world

Monthly rental

£395 pcm + £245 set up

MOBILE CONSULTANCY

Stonemartin now offers an in-house mobile communication consultancy service in conjunction with MBT Communications LTD.

We can offer you market leading packages on all four of the UK's major business networks and provide specialist advice on all mobile data services such as Blackberry, Windows Mobile, and Mobile Broadband.

STONEMARTIN I.T. DATA SERVICES

PROVIDED BY DATAPACT LTD

Stonemartin's new I.T. Services provides their customers (you) with some new exciting opportunities which will reduce cost and give you one point of contact for all your I.T. needs.

Stonemartin should now be considered as a complete solutions provider for resident and non-resident customers anywhere in the world. Stonemartin can provide office space, phone and internet as before but can now add hardware, software and support all under one roof.

NEW SERVICES THAT CAN BE PROVIDED

CONSULTANCY

We can provide a cost effective consultancy and engineering service that will deliver well over your expectations. Highly experienced and accredited engineers can be resourced on an ad-hoc or continual basis and will form an extension of your internal resources.

HARDWARE AND SOFTWARE SUPPLY

As an HP Preferred Partner, a Dell Direct Partner and being Microsoft Accredited, we can now offer clients a professional and leading edge service.

MAINTENANCE

Any of our standard Maintenance and Support packages can be tailored to suit individual customers' needs. Our aim is always to minimise system down time by resolving a problem at the first visit, if necessary by leaving loan equipment. Organisations can avoid employing dedicated I.T. staff by utilising our engineers to perform tasks such as network management, preventative maintenance and housekeeping tasks on a regular basis.

SECURITY, ANTIVIRUS, FIREWALLS

Working with major security vendors we can offer a range of security solutions to reduce the risk of attacks.

OFFSITE BACKUP/HOSTING

Offsite backup reduces the risk of any loss of data due to fire or terrorism. We can also host files or websites for you and your own customers, again reducing the need for unnecessary hardware and software.
